

Mate Ultra TEC[®] Punch Guide Assemblies With M14 Bolt

Introducing....

Mate Ultra TEC[®] Punch Guide Assemblies with M14 bolts.

The Mate Ultra TEC[®] precision tooling system for thick turret punch presses increases tool performance and flexibility, offers extended tool life and allows interchangeability with existing tooling inventory.

Mate Ultra TEC punch guide assemblies with M14 bolts provide many important benefits, including:

- Quick length adjustment - no shims or tooling required.
- Internal and external grooves for superior lubrication.
- Hardened and ground surfaces for maximum turret bore life.
- High performance stripping springs for extended service life.
- Full compatibility with existing M14 threaded punches.
- Conversion kit for compatibility with M12 threaded punches.

Mate Ultra TEC guides with M14 bolts are available in two versions:

Ultra TEC[®]

- Quick-change stripper release mechanism allows stripper to be removed quickly and easily, without tools.
- Quick length adjustment mechanism on the side of the guide allows the punch length to be adjusted without disassembly.

Ultra TEC[®] Fully Guided

- Fully guided stripper to guide the punch tip for improved piece part quality and extended punch life. Ideal for slitting and nibbling applications.
- Quick length adjustment mechanism on the side of the guide allows the punch length to be adjusted without disassembly.

Also available is an M14 punch driver conversion kit to convert existing Mate Ultra TEC guides with M12 bolts to suit punches with an M14 thread.
